Issues to fix (26)

Medium Images without alt text

18 of 45 images have no alt attribute.

How to fix: Add a short description in `alt=""` for meaningful images, and `alt=""` (empty) for purely decorative ones.

Medium Form fields without labels

1 of 3 form fields have no label.

How to fix: Give every input a `<label for="...">`, or an `aria-label` if a visible label is impossible.

Medium Links without readable text

7 link(s) have no text or accessible name.

How to fix: Add visible text, an `aria-label`, or alt text on the image inside the link.

Medium HSTS header missing

No Strict-Transport-Security header on the HTTPS response.

How to fix: Send `Strict-Transport-Security: max-age=31536000; includeSubDomains` on HTTPS responses (start with a shorter max-age if you're unsure every subdomain supports HTTPS).

Medium No H1 heading

No H1 heading on the page.

How to fix: Add one clear H1 that matches the page topic.

Low Positive tabindex values

1 element(s) have tabindex > 0.

How to fix: Use tabindex="0" or "-1" only, and fix the order in the HTML instead.

Low Server only speaks HTTP/1.1

The server negotiated HTTP/1.1 even though HTTP/2 was offered.

How to fix: Enable HTTP/2 on your server or CDN (it requires HTTPS). HTTP/3 (QUIC) is a further boost on mobile networks.

Low Images without width/height

45 of 45 images have no width/height attributes.

How to fix: Add width and height attributes (CSS can still make them responsive with `height:auto`).

Low Off-screen images not lazy-loaded

40 images further down the page load eagerly.

How to fix: Add `loading="lazy"` to images below the fold — but not to the main hero/LCP image.

Low Images not in modern formats

45 of 45 images are JPEG/PNG/GIF without a WebP/AVIF alternative.

How to fix: Serve WebP/AVIF (with <picture> fallbacks if you need them) or let an image CDN negotiate the format.

Low No security.txt file

/.well-known/security.txt was not found (or has no Contact: line).

How to fix: Publish /.well-known/security.txt with at least a `Contact:` and an `Expires:` line.

Low X-Content-Type-Options missing

X-Content-Type-Options: nosniff is not set.

How to fix: Send `X-Content-Type-Options: nosniff` on all responses.

Low No Referrer-Policy

No Referrer-Policy header.

How to fix: Send `Referrer-Policy: strict-origin-when-cross-origin`.

Low No Permissions-Policy

No Permissions-Policy header.

How to fix: Send e.g. `Permissions-Policy: camera=(), microphone=(), geolocation=(), payment=(), usb=()`, allowing only what you need.

Low Title is likely to be truncated

“GSMArena.com - mobile phone reviews, news, specifications and more...” is 69 characters.

How to fix: Shorten it to about 60 characters with the most important words first.

Low Meta description is short

“GSMArena.com - The ultimate resource for GSM handset information” is 64 characters.

How to fix: Aim for 120–160 characters describing the page’s value.

Low Missing Open Graph tags

Missing: og:title, og:description, og:image.

How to fix: Add og:title, og:description, og:image (1200×630) and og:url.

Low No structured data

No JSON-LD or microdata found.

How to fix: Add JSON-LD for your organisation/website, plus the type that fits each page (Article, Product, LocalBusiness...). Check it with Google’s Rich Results Test.

Low Pages without meta descriptions

2 of 20 other indexable page(s) have no meta description.

How to fix: Add a 120–160 character description to your important pages.

Low Duplicate meta descriptions

1 description(s) are reused across pages.

How to fix: Write a unique description per page, or leave it empty for low-value pages rather than duplicating.

Low Thin pages

4 page(s) have fewer than 200 words of visible text.

How to fix: Expand them with genuinely useful content, merge similar pages, or noindex utility pages.

Info Duplicate element IDs

3 id value(s) are used more than once.

How to fix: Make every id attribute unique on the page.

Info Brotli compression not offered

The server answered a Brotli-capable request with gzip.

How to fix: Enable Brotli on the server (nginx brotli module, Apache mod_brotli) or let your CDN handle it.

Info No IPv6 address

www.gsmarena.com has no AAAA record.

How to fix: Add an AAAA record if your host or CDN supports IPv6.

Info No CAA record

No CAA records for www.gsmarena.com — any public CA may issue certificates.

How to fix: Add e.g. `yourdomain. CAA 0 issue "letsencrypt.org"` for each CA you use (check your CDN's required CAs first).

Info Pages set to noindex

3 crawled page(s) are set to noindex.

How to fix: Check the list and remove noindex from any page you want in search results.

Passed checks (24)

Valid SSL certificate · HTTP redirects to HTTPS · Content-Security-Policy present · Clickjacking protection · No mixed content · Fast server response · Text compression enabled · Lean HTML · Few render-blocking resources · Page loads successfully · Page is indexable · Canonical URL set · Mobile viewport set · robots.txt allows crawling · XML sitemap found · Missing pages return 404 · One preferred hostname · Page language declared · Logical heading structure · Standards-mode HTML5 document · SPF record present · DMARC policy enforced · No broken links found · Page titles are unique
