Issues to fix (14)

Medium Page language not declared

The html element has no lang attribute.

How to fix: Add a lang attribute to the `<html>` tag, e.g. `<html lang="en">`.

Medium HTTP does not redirect to HTTPS

<http://www.iana.org/> returned 200 without redirecting.

How to fix: Add a permanent (301) redirect from every `http://` URL to the same `https://` URL at the server or CDN level.

Medium Missing meta description

No meta description tag found.

How to fix: Write a unique 120–160 character summary that tells searchers why to click.

Medium No XML sitemap found

Checked `robots.txt`, `/sitemap.xml`, `/sitemap_index.xml` and `/wp-sitemap.xml`.

How to fix: Generate an XML sitemap, reference it in `robots.txt` and submit it in Google Search Console and Bing Webmaster Tools.

Medium Pages without meta descriptions

24 of 24 other indexable page(s) have no meta description.

How to fix: Add a 120–160 character description to your important pages.

Low No security.txt file

/.well-known/security.txt was not found (or has no Contact: line).

How to fix: Publish /.well-known/security.txt with at least a `Contact:` and an `Expires:` line.

Low CSP allows unsafe inline scripts

script-src: 'self' 'unsafe-inline' 'unsafe-eval' https://www.google.com https://cse.google.com
https://clients1.google.com

How to fix: Replace 'unsafe-inline' with per-request nonces or script hashes, ideally with 'strict-dynamic'.

Low No Permissions-Policy

No Permissions-Policy header.

How to fix: Send e.g. `Permissions-Policy: camera=(), microphone=(), geolocation=(), payment=(), usb=()`, allowing only what you need.

Low Missing Open Graph tags

Missing: og:title, og:description, og:image.

How to fix: Add og:title, og:description, og:image (1200×630) and og:url.

Low No structured data

No JSON-LD or microdata found.

How to fix: Add JSON-LD for your organisation/website, plus the type that fits each page (Article, Product, LocalBusiness...). Check it with Google's Rich Results Test.

Low robots.txt doesn't list a sitemap

No "Sitemap:" line in robots.txt.

How to fix: Add `Sitemap: https://yourdomain/sitemap.xml` (absolute URL).

Low Thin pages

1 page(s) have fewer than 200 words of visible text.

How to fix: Expand them with genuinely useful content, merge similar pages, or noindex utility pages.

Info **Not ready for the HSTS preload list**

For preload the header still needs: includeSubDomains.

How to fix: Serve `max-age=31536000; includeSubDomains; preload` on the root domain, redirect http→https on the same host first, then submit at hstspreload.org.

Info **DMARC is monitor-only (p=none)**

DMARC record: v=DMARC1; p=none;fo=1; rua=mailto:tutnr7vw@ag.us.dmarcian.com; ruf=mailto:dmarc-ruf@iana.org;

How to fix: Once reports show your legitimate mail passes, move to `p=quarantine`, then `p=reject`.

Passed checks (29)

Valid SSL certificate · HSTS enabled · Clickjacking protection · MIME sniffing disabled · Referrer-Policy set · No mixed content · Fast server response · Brotli compression · HTTP/2 and HTTP/3 supported · Lean HTML · Few render-blocking resources · Static files are cacheable · Page loads successfully · Page is indexable · Good page title · One clear H1 · Canonical URL set · Mobile viewport set · robots.txt allows crawling · Missing pages return 404 · One preferred hostname · Links and buttons have names · Logical heading structure · Standards-mode HTML5 document · SPF record present · CAA records restrict certificate issuance · Reachable over IPv6 · No broken links found · Page titles are unique
